

Small update: Lots going on this week, including a record-breaking week for number of jobs (152). As many of you will remember, we did a survey back in September to get some feedback about the website. While there were no major suggested changes that came out of the survey, there were a few smaller ones that we are finally getting around to. The first is that, if you happen to notice, there is an “Upcoming Deadlines” short list on the right-hand side of the [homepage](#). More than a few folks said that having those jobs be on the very same day was too short notice, so we’ve made those jobs (1) three days out and (2) limit them to three days’ worth of jobs, so it’s more manageable. Another update coming next week.

On to the jobs...
