

It just so happens that I will be in New Orleans during the week that AGU is taking place, although not attending the conference. So, I was wondering if there are a group of you all that will be there and would be interested in an informal drinks gathering (à la World Water Week). If you are going, just put your first name in the [Doodle](#) table. I will see what interest there is right now and will specify a date and venue at a later time if there are enough people.
