

## **MS/PhD Assistantships – Dept. of C & EE – Villanova University**

Villanova University's Department of Civil and Environmental Engineering is seeking graduate students (PhD or MS) interested in pursuing water resources engineering questions related to fluvial geomorphology, floodplains, dams and reservoirs for full research fellowships. The research fellow will explore mechanisms governing river geometry, floodplain evolution and river response to dams. The student will be encouraged to investigate scientific questions using a combination of remotely sensed data, GIS data, and field work. The student will have the opportunity to interact with a diverse group of researchers and become part of an energetic and driven group of researchers keen to understand more about water resource engineering.

Villanova University is an equal opportunity employer and it has been ranked as the No. 1 Comprehensive University in the North by US News and World Report for the last 23 years. The university is located 12 miles from Philadelphia along the historic Main Line. From its founding in 1842 to its position today as a leading Roman Catholic university, Villanova University has forged a path of academic excellence. **Positions will start in January, 2016.** Interested persons should contact Dr. Virginia Smith at [Virginia.Smith@villanova.edu](mailto:Virginia.Smith@villanova.edu) for more information as soon as possible.
