

# travel2change

Travel has the potential to be a means for positive change in the lives of travelers, hosting communities and the world. The non-profit organization travel2change seeks to realize this potential by connecting these communities to create change. **Here's how it works:**

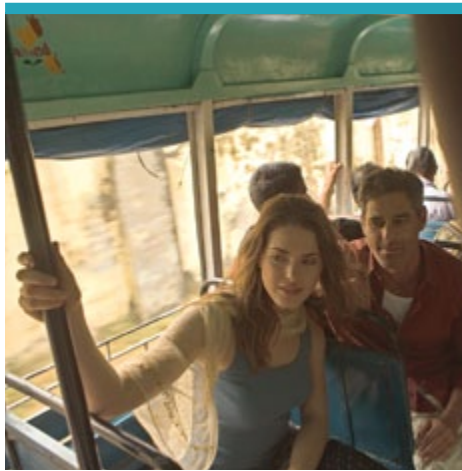

## 1. Inspire

### Generate ideas

Create project ideas that will have a positive impact on the lives of hosting communities. For the first challenge, project ideas need to be related to the broad theme of water.

## 2. Experience

### Travel to realize ideas

Travel2change is not only about ideas. It's about making ideas happen. Together with our partners we reward the best ideas with trips and financial support to bring them to life.

## 3. Interact

### Share your experiences

Upload pictures, create videos and post on your and our social media platforms to share your experiences with the community. We seek to learn for the next idea challenge!

Join the community and contribute to the travel2change idea challenge:  
How can we travel to create a positive impact on the lives of hosting communities?  
**Let's rethink travel and realize your ideas!**
